THE LIFE JOURNEY OF A WAFER: A MANUFACTURING DAY CELEBRATION

Ever wondered what goes into making the microchips that power the technology that we use every day? Here's your chance to learn from the women at Intel who help make it happen! During this one-hour virtual session, you will hear

from several different Intel employees about their roles, career journeys, and more. We will also be playing an interactive Kahoot game at the end of the session with the chance to win fun prizes!
